

Introduction to Microbiology lab

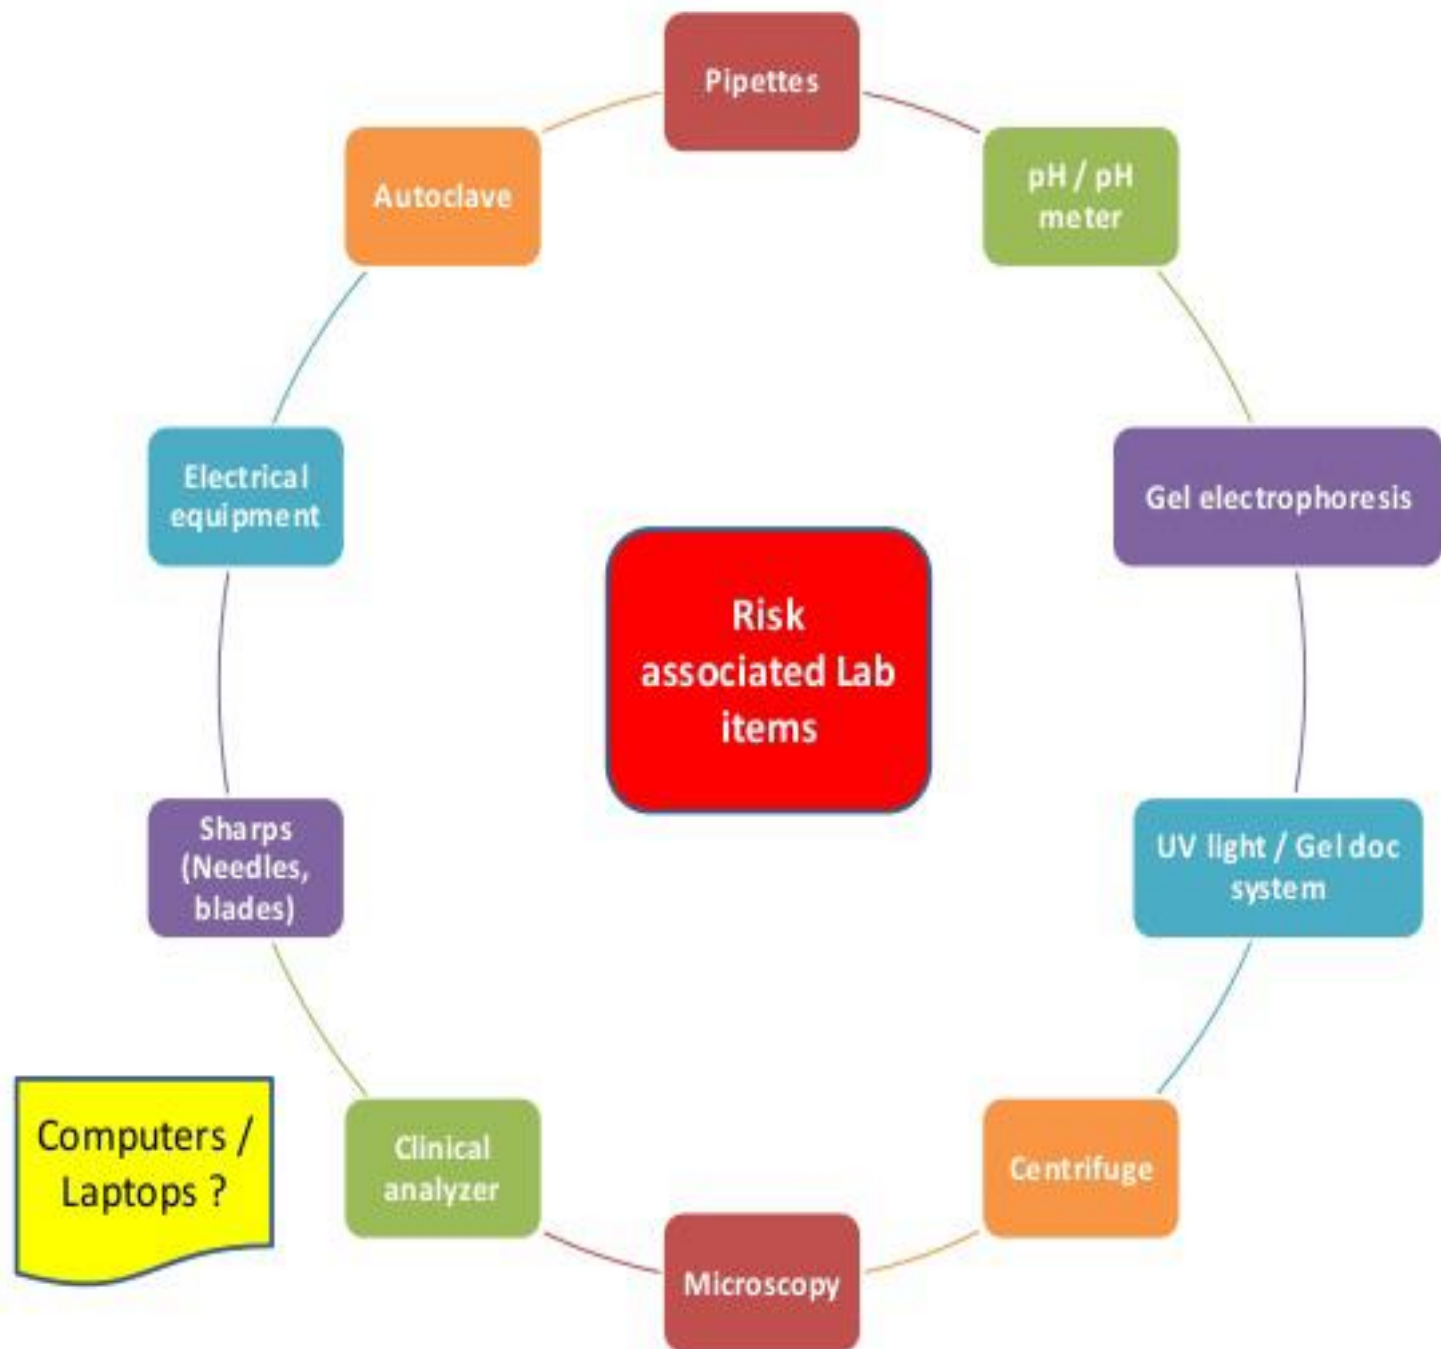

prof.kareem thamir

MSc . Hussein alssafy

2026-2027

Lab- I

Specific Guidelines for LAB Safety

1. Place all extra clothing and books in an appropriate place.
2. Eating, drinking, and smoking are forbidden in the laboratory.
3. Return all reagents, cultures, and glassware to their appropriate places.
4. Wear a laboratory coat.
5. Do not place anything in your mouth.
6. Clean your work area.

Specific Guidelines for LAB Safety

1. When infectious material is accidentally spilled, cover it immediately with a disinfectant and notify your instructor at once.
2. Flame wire loops and needles before and after transfer of cultures.
3. Wash your hands thoroughly before and after each experiment.
4. All specimens of blood and body fluids should be put in a well-constructed container.
5. Biological safety cabinets should be used.
6. Mouth pipetting must not be done,
7. All persons should wash their hands after completing
8. laboratory activities.

Do's & Don'ts

In the Lab

Aseptic technique must be observed at all times while working with infectious materials (blood, pathogens, microorganisms)

Use of Safety cabinets and fume hoods

Microbiology Lab Equipment

- Microscope
- Microscope slides and Cover slips
- Inoculation loops
- Source of flame (Bunsen burner)
- Gram staining kits
- Petri dishes and proper growth media
- Incubators
- Autoclave

Thank you
